Adityanand Guntuboyina

Aditya was a great TA! His sections were always well-attended, and he did a wonderful job in presenting the material and addressing student questions. Like Professor Leeb, he would never dismiss a question, but would consider it carefully and answer it thoughtfully. He was always accessible by email, and was extremely helpful and approachable. He explained things clearly and never flaunted his intelligence (as some TAs are apt to do). He's the best math TA I've had here yet at Yale.

What are the strengths and weaknesses of your teaching assistant (discussion section leader, lab section leader, grader or other assistant) as an instructor, and how might his/her teaching be improved?

Adityanand Guntuboyina

Aditya seemed like a very helpful TA. I actually never attended the TA section, but I think it was common knowledge that by the end of the course, Aditya was giving out the answers. This allowed students to get through the homework, but it seemed to have a few drawbacks. I would have preferred it if Professor Leeb and Aditya had coordinated more closely, recognized that the homeworks were getting too difficult, and scaled them back a bit. (The consequence of doing things this way seemed to be the final exam, which I think most students found almost bewilderingly hard.)
